max	Permissible load with extended dipper stick
A	Outreach from middle of rotating assembly
B	Load hook height
*	Lifting force limited by hydraulics
	With or without dozer blade support in travel direction
	With or without dozer blade support 90° from the travel direction

All table values are specified in kg (lbs.), in a horizontal position on a solid surface and without a bucket or an attachment.

If a bucket or other attachment is mounted, the lifting force or tipping load is reduced by the device's dead weight.

Base of calculation: according to ISO 10567

The lifting force of the vehicle is limited by the settings of the pressure relief valves and hydraulic performance or by the tipping safety mechanism.

Neither 75% of the static tipping load nor 87% of the hydraulic lifting force are exceeded.
